

Instructions for presentation

A technical session consists of several 18-minute presentations, each including a 3-minute Q&A session.

- All presenters are expected to attend the session during their assigned time slot. If a presenter is absent at the scheduled time, the presentation will be marked as a no-show. In such a case, please wait until the next presenter's slot, instead of moving on to the next presenter.
- The projector in the conference room can be connected via HDMI, and an HDMI cable will be provided.
- A laptop computer is installed in the conference room. Before starting the session, the presentation file will be copied to the laptop computer.
